PROFILE

Professional software developer with 4+ years of experience ranging from full-stack web development to data engineering. Looking to work remotely for a company outside my country as the next step in my career.

EMPLOYMENT HISTORY

Jan 2020 — Oct 2022

Head of BI & Software Development, Tecnoedil S.A.

Asunción

- Created and led the Department of BI and Software Development at the company
- Managed multiple successful software development projects leading a team of developers
- Built, improved and helped deploy many containerized Node.js micro-services
- Used React and Redux to create components for a number of web applications
- Refactored multiple parts of our code base according to standards and best practices
- Maintained, unit-tested, and debugged all of the enterprise's web applications
- Collaborated with my team to design applications according to specifications
- Improved the performance of many React components, increasing their response times up to 20%
- Built an internal Python tool that helped the BI team write and debug ETL processes faster
- Created and maintained the company's enterprise data warehouse and Power BI Reports

Sep 2017 — Dec 2019

Data Engineer, Netsystem S.A.

Asunción

- Designed and developed dimensional data warehouses and data pipelines for our customers, using tools such as Python, Pandas, Airflow, Selenium, and SQL
- Designed and delivered Power BI/DAX courses for many renowned local companies, many of which later became customers

EDUCATION

Jan 2010 — Sep 2015

Licenciatura in Philosophy, Universidad Católica Nuestra Señora de la Asunción

Asunción

Graduated with a thesis on Bertrand Russell's scientific realism
